# Moving Forward Together

November 17, 2006

# Rebalancing LTC:
## It's more than just OPTIONS!

The population of Senior Hoosiers (Age 60+) is the segment of our community whose healthcare delivery service options are most affected by non-healthcare factors. These factors include the level of access to several key support services:

- Reliable, on-demand Transportation
- Affordable Housing
- Nutritious Meals

# Statewide Needs Assessment
## April 2006

*The most prominent findings from the survey analyses found the following needs and gaps in service*
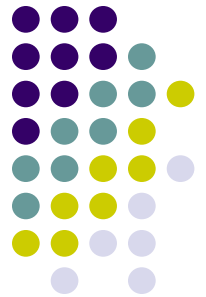

- Transportation
- Adult Day Services
- In-Home Services
- Outreach
- Case Management
- Nutrition Services
- Disease Prevention and Health Promotion Services

# State of Indiana Real Change Systems Grant: CMS Comments

- Interagency collaboration is minimal.

- While the State has some points that may be moving toward transformation, this state does not meet even "Preliminary".  They may be considered Pre=Preliminary.

- Several issues call into question whether the system is yet at a preliminary stage for transformation: The difference between the ADRC agency and the AAA group is unclear, both current and proposed direction

# Indiana Elder Affairs Network

## The Vision

### Coordinated Support Services

- Transportation
- LTC Insurance
- Veterans Affairs
- Health Promotion
- Advocacy
- Nutrition
- Housing
- Legal
- Senior Employment

### Financial

- Systemic Financial Transparency
- Contiguous Business Practices across Agencies
- Financial Dashboard

### Core Principles

- **Customer Focused**
- **Fiscal Accountability**
- **Integrated Services**
- **Efficient Deliver**

### LTC Service Delivery

- Adult Day Services
- Adult Foster Care
- Assisted Living
- Nursing Facilities
- Home Health

### Technology

- Enterprise Case Management
- Elder Affairs Portal Clearinghouse
- Cross-Agency Serv Delivery Visibility
- Enhanced Reporting
- Automated Claiming

### Administrative Consolidation

- Statewide Purchasing Contracts
- Statewide Service Contracts
- Self-sustaining ADRCs

### Interagency Collaboration

- Multi Channel Communication
- Dept. of Insurance
- ISDH
- IOTS
- IHCOA
- INDOT

# Building the Elder Affairs Network
## What is it?

- **Coordinated Services**
  - Expanded Healthcare Delivery Options
  - Support Services
  - Case Management
  - Local Support

- **Single Point of Access to Coordinated Services**

# Building the Elder Affairs Network: Annual Investments

- $7 million for meals
- $1 million for transportation
- $1 million for affordable housing
- $1 million for infrastructure

**\* Based upon availability of funds**

# Building the Elder Affairs Network
## How do we get there?

- Sixteen ADRCs in existing AAA PSAs
- Direct investment in support services
- Commit CHOICE funds to support service expansion
- Integrate data access and data management
- Establish and meet annual funding goals for creating and supporting IEAN

# **Building the Elder Affairs Network**
## **Mutual Agreements**

- Maintain appropriation / allocation
- Acceptance of the enhanced service challenges
- Use statewide purchasing power
- Adopt administrative simplification, best practices, common processes, and technology
- Support FSSA and Division of Aging Agenda
